Homework 1

1. **(Optional)** If you want to have a look at the code presented in the lectures, install Scala available (for free) from

http://www.scala-lang.org

The web-applications from the first lecture are written in Scala using the Play Framework available (also for free) from

http://www.playframework.org

2. Practice thinking like an attacker. Assume the following situation:

Prof. V. Nasty gives the following final exam question (closed books, closed notes):

Write the first 100 digits of pi: 3._____

Think of ways how you can cheat in this exam?

- 3. Explain what hashes and salts are. Describe how they can be used for ensuring data integrity and storing password information.
- 4. What are good uses of cookies (that is browser cookies)?
