

Dear All,

While showing how to hack in the last lecture, I forgot to make an important announcement: the next lecture on 15 October will be a guest lecture given by Richard Overill. He will present non-examinable material. I hope you still come. Richard is an expert in Cybercrime & Cyberterrorism and often works with the Met Police Security Force. So he has first-hand knowledge about all sorts of hacking.

The lecture on the 22nd will be "normal" again given by me.
